AUTOMATION TECHNOLOGY FROM MURRELEKTRONIK

ENGINEERING EXCELLENCE

FOR DECENTRALIZED INSTALLATION CONCEPTS

Murrelektronik is a world leader in the field of automation technology. The German company's global philosophy of 'Engineering Excellence' is followed by 1.900 employees worldwide. So it follows that our united approach to create more efficient and reliable I/O wiring solutions, has positioned Murrelektronik as a leading provider of IP67 automation technology. Cutting edge technology, solutions for complex systems, customer satisfaction and optimum service – this is Murrelektronik.

RELIABLE AND EFFICIENT

- Highest productivity – throughout the machine's life
- The highest quality to ensure a long life
- References of renowned customers
- 4 million fieldbus modules operating across the world
- Maintenance-friendly for easy maintenance

**COMPONENTS TO YOUR
SUCCESS!**

THIS IS MURRELEKTRONIK!

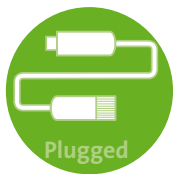

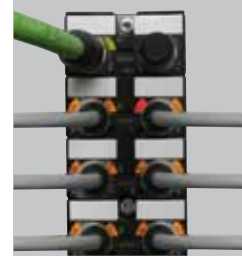

- 1.900 employees
- € 220 mil in sales in 2014
- 21 branch offices guarantee worldwide support and a high availability of spare parts

FACTS AT A GLANCE

PRECISE DIAGNOSTICS

Murrelektronik's diagnostic options immediately locate defective sensors, actuators and cables immediately and failures are quickly eliminated.

REDUCED FAILURE RISK

Each connection point is a potential failure risk. Murrelektronik's solutions significantly reduce the number of connection points, increasing the operational reliability.

MULTIFUNCTIONAL PRODUCTS

Ports can be configured as input or output, depending on the requirements. This facilitates service and reduces the parts keep in stock.

RUGGED

Murrelektronik's modules are fully potted. They are completely sealed and withstand all kinds of external impacts.

COMPLETELY MOLDED CONNECTORS

The connectors are absolutely sealed and protected from interference. An anti-vibration locking ensures lasting connections. The torque wrench shows with an audible click that the connections are sealed.
